Jessica GELeration Aftercare Advice

Recommended Homecare Products

- Jessica Phenomen Oil
- Jessica Hydracreme or Jessica Body Treats Lotion
- The Jessica Custom Nail Colour to match their gel manicure for a pedicure at home.
- GELeration REMOVAL KIT (available to order)

Aftercare Advice

- Always book a follow up appointment before leaving the salon.
- Never use nails as tools or exert unnecessary pressure on them.
- Avoid heat after application where possible.
- Wash your hands after using sun cream, tinted, lotions, insect repellent and coloured hair products as they may contain chemicals that may react/weakening your gel nails.
- Clients should contact their therapist with any problems.
- Jessica suggests using retail products to continue manicure\pedicure at home.
- Jessica recommends that clients return to salon to soak-off their gels, or use the GELeration REMOVAL KIT.
- Never bite, cut or file your gel nails as it will “break the seal” and encourage the gel to lift. Picking and peeling the gel off the nail can damage natural nails by removing fine layers from the nail plate.
- Jessica does not recommend Nourish for homecare as it may affect the longevity of the gel.
- Wear rubber gloves for cleaning, gardening, etc, to protect your gel nails.
- Use Jessica Phenomen Oil on the cuticles to keep the nails moisturised and flexible.
